

# Espaces Cyclophones Technical sheet

The Espaces Cyclophones can occupy from 20 to 500m<sup>2</sup>, depending on the installation.

As the sounds produced are not amplified, to hear them clearly it is preferable to have the installation set-up in a calm and fairly quiet area.

## PRATICAL INFORMATION

We need no outside assistance while setting-up or dismantling, or when the activity is open to the public.

The only technical requirement is about a hundred litres of water and in certain cases a ladder.

## TECHNICAL SPECIFICATIONS OF THE INSTALLATIONS

### Vélorgue *(dimension of the base, 2m40x1m20)*

**Set-up time:** 1 – 2 days / **dismantle time:** 4 hours

**Required space:** 20 – 100 m<sup>2</sup>

**Team:** 2 people

#### **Provided by the client:**

A large stepladder

Attachment points to hang the tubes and instruments:

Three to four trees with a distance of about 10 metres between each one would be ideal. In an urban space, we need to be able to have attachment points on the buildings or lampposts. If necessary, the possibility of using a support structure for the installation.

**N.B.** the tubes weigh about 60 kilos spread over about a hundred attachment points. It actually represents very little weight or stress on each individual point.

### Véleau

**Set-up time:** 2 – 3 hours / **dismantle time:** 2 hours

**Required space:** 30m<sup>2</sup>

**Team:** 2 people

**technical requirement :** 60 Liter of water

The installation is made up of three parts:

- an indoor bike (2m60x80cmx1m20)
- a frame supporting a water paddle (3mx1m50x2m50)
- a bathtub (2mx1mx1m)

Tubes link these three elements together.

# Cyclo-aquaphonique *(3,5mx4mx3m)*

**Set-up time:** 2 hours / **dismantle time:** 2 hours

**Required space:** 30m<sup>2</sup>

**Team:** 2 people

**technical requirement :** 60 Liter of water

# Cycloscopes *(50cmx1mx1m50)*

**Set-up time:** 10 – 30 minutes / **dismantle time:** 10 minutes

**Required space:** 10 – 30m<sup>2</sup>

**Team:** 1 person

Ten or so Cycloscopes will be available.

# Cyclo-dynamo #1 et #2

**Set-up time:** 10 minutes / **dismantle time:** 10 minutes

**Required space:** 10 m<sup>2</sup>

**Team:** 1 person

The installation is made up of three parts:

- a bike
- sound tube / 1 on a stand (∅ 1m20)
- sound tube / 2,5 m x 0,8 x 0,8

# The Cyclo-dynamo fleet

**Set-up time:** 10 – 30 minutes / **dismantle time:** 20 minutes

**Required space:** 2 – 10m<sup>2</sup> for parking

**Team:** 1 person

Ten or so bikes will be available to ride around on.

# Atelier Cyclo-dynamo

**Set-up time:** 1 hour / **dismantle time:** 1 hour

**Required space:** 10 – 40m<sup>2</sup>

**Team:** 2 people

**Provided by the client:** an electrical outlet to recharge the screwdrivers

# Vièlo *(3mx80cmx1m50)*

**Set-up time:** 20 minutes / **dismantle time:** 20 minutes

**Required space:** 5 m<sup>2</sup>

**Team:** 1 person
